KATYAYAN SHARMA

CLOUD & BI PLATFORM ENGINEER

Gurugram, India, +91 6263815140, katyayan.sharma00@gmail.com
github.com/shark-2000, shark-2000.github.io

PROFILE

Cloud & BI Platform Engineer with 4+ years of enterprise analytics infrastructure, cloud administration, IAM and production support. Currently supporting American Express's migration to MicroStrategy Cloud Managed on GCP. Independently build Kubernetes, GitOps and offline-first platforms with an emphasis on reliable operations.

EXPERIENCE

AMERICAN EXPRESS | Engineer III via NucleusTeq | Sep 2026–Present

- Support American Express's MicroStrategy Cloud Managed migration to GCP by assessing platform dependencies, target-cloud readiness, IAM requirements and cutover prerequisites.
- Maintain cloud environment health, network connectivity and platform configurations through proactive operational checks, troubleshooting and GitOps-managed customizations to support service continuity.

ZS ASSOCIATES | Senior Software Engineer via Netlink Software | 2023–Sep 2026

- Maintained 99.99% service uptime across 60+ Tableau and MicroStrategy servers through proactive monitoring, preventive maintenance and incident management, minimizing disruption to enterprise BI workloads.
- Strengthened access security across 10 AWS accounts supporting 5,000+ users by centralizing privileged credentials in an internal administrative account and enabling read-only cross-account access through IAM AssumeRole.
- Rebuilt a Java-based AWS administration solution in Python, improving audit traceability, credential rotation workflows and maintainability for cross-account operations.
- Supported governed analytics access across Databricks, ADLS and Unity Catalog by resolving permissions and integration issues affecting downstream BI workloads.

REXALL | MicroStrategy engagement via Netlink Software | 2022–2023

- Supported Rexall's MicroStrategy environment through platform administration, technical training and client-facing support activities.

INDEPENDENT ENGINEERING PROJECTS

AQUAVAULT OS | Self-hosted platform engineering lab | 2026

- Engineered a self-hosted ARM64 platform on Raspberry Pi 500+ with single-node k3s, Argo CD and GitHub Actions; deploy and maintain containerized services through GitOps with persistent Kubernetes storage.
- Built WorkOS on Nextcloud with Authentik SSO, Cloudflare Tunnel and PostgreSQL/Redis; developed file-centric collaboration workflows for integrated chat, calls and screen sharing, alongside encrypted incremental backup and restore-verification capabilities.

ELEUMOK | Offline-first music platform | 2026

- Built an offline-first Flutter player with a self-hosted media workflow: sync YouTube playlist metadata, fetch audio using a scripted yt-dlp process and enable local playback.

TECHNICAL SKILLS

PLATFORM & DEVOPS Kubernetes (k3s), Argo CD, GitOps, Docker, GitHub Actions, Linux, CI/CD

CLOUD & INFRASTRUCTURE AWS (Lambda, S3, IAM, SSM, API Gateway), GCP, Azure, Cloudflare

ENGINEERING & DATA Python, Bash, FastAPI, REST APIs, SQL, PostgreSQL, Flutter/Dart, Databricks

ENTERPRISE & SECURITY MicroStrategy, Tableau Server, Authentik, SAML, RBAC, IAM, Incident response

EDUCATION

B.Tech, Aerospace Engineering | SRM Institute of Science and Technology | 2018–2022

CERTIFICATIONS

MicroStrategy Certified System Administrator, Platform Administrator, Analyst
